About Us

We are manufacturers of all kinds of Industrial Process Chillers viz. Air Cooled Chillers, Water Cooled Chillers, Reciprocating Chillers, Scroll Chillers, Screw Chillers; corporate office based at Mirzapur, Varanasi Zone and works based at Ghaziabad, Delhi NCR. We also manufacture Heat Exchangers – Evaporators, Condensers, Shell and Tube type, AI Finnes and Tube types.

We have ready stock of all Spare Parts for Chillers such as Filter Driers, Expansion Valves, Compressors, Electrical Control Panel, Refrigerant Gases, Valves, Temperature Indicator and Controllers etc.

N.K. Chillers has an experienced team of service Engineers. We provide servicing of all warranty or non-warranty chillers, manufactured by N.K.Chillers or any other manufacturer. Repairing and servicing department has been our strongest pillar since our foundation.

Water Cooled Scroll Chiller

A Water-Cooled Scroll Chiller is an energy-efficient cooling system that uses scroll compressors to provide reliable temperature control for industrial and commercial applications.

Capacity range: 5 TR to 50 TR

Temperature (+) 25°C to (-) 10°C range:

Water Cooled Screw Chiller

A Water-Cooled Screw Chiller is an efficient cooling system using screw compressors, ideal for industrial and commercial applications requiring precise temperature control.

Capacity range: 30 TR to 500 TR

Temperature range: (+) 25°C to (-) 10°C

Water Cooled Reciprocating

Water-cooled reciprocating chiller: Efficient cooling system using reciprocating compressors and water-cooled condensers for industrial and commercial applications.

Capacity range : 2TR to 120 TR

Temperature range: (+) 30°C to (-) 45°C

Works (2) : Plot No. 39, Khasra No. 197/1, Sybly Industrial Area, MuradNagar, Ghaziabad, Uttar Pradesh, India
201 204

Corporate Office & Works: 58, Bahuar, Chunar, Mirzapur, Uttar Pradesh, India

Air Cooled Scroll Chiller

Efficient and compact, our Air Cooled Scroll Chiller delivers reliable cooling for various applications with low maintenance and energy savings.

Capacity range : 5 TR to 50 TR

Temperature range: (+) 25°C to (-) 10°C

Air Cooled Screw Chiller

Efficient and compact, our Air Cooled Screw Chiller ensures reliable cooling with low maintenance.

Capacity range : 30 TR to 400TR

Temperature range: (+) 25°C to (-) 10°C

Air Cooled Reciprocating Chiller

An Air-Cooled Reciprocating Chiller is a compact and efficient cooling system that uses reciprocating compressors and air-cooled condensers

Capacity range : 2 TR to 120 TR

Temperature range: (+) 30°C to (-) 25°C

Works (2) : Plot No. 39, Khasra No. 197/1, Sybly Industrial Area, MuradNagar, Ghaziabad, Uttar Pradesh, India
201 204

Corporate Office & Works: 58, Bahuar, Chunar, Mirzapur, Uttar Pradesh, India

Plate Heat Exchanger

Spare Parts Of Chiller

Why Choose Us

At N K Chillers, we pride ourselves on being a trusted leader in the manufacturing of Air-Cooled Chillers, Water Cooling Towers, Water Chillers, and Water-Cooled Chillers.

Superior Quality

Our products are engineered using cutting-edge technology and top-grade materials, ensuring optimal performance and longevity in demanding industrial environments.

Energy Efficiency

We design our chillers and cooling towers with a focus on energy-saving solutions that help reduce operational costs without compromising on cooling efficiency.
